

Team Norms

Communication

Team members must attend at least two stand-up meetings per week.

- Purpose of Stand-Up Meetings: Share what was accomplished, outline what will be worked on next, and identify blockers or issues.
- Addressing Issues: If a member cannot attend, they must provide an update asynchronously (e.g., via email or group chat) before the meeting.

Accountability

Each member is responsible for completing their assigned tasks by the agreed deadlines.

- Issue Mitigation: If a deadline cannot be met, the member must communicate the delay and request assistance or extensions as early as possible.

Respect for Team Members

Everyone's ideas and contributions must be respected, with open and constructive feedback provided.

- Addressing Issues: Use respectful language during discussions, and resolve conflicts privately with a mediator if needed.

Task Clarity and Ownership

Each team member is assigned clear tasks with deadlines.

- Addressing Issues: Ambiguities or conflicts over task ownership should be resolved during stand-up meetings or by reaching out to the project lead.

Collaboration

Team members should actively collaborate on tasks with overlapping responsibilities.

- Addressing Issues: Use shared tools (e.g., GitHub, Trello) to coordinate work and avoid duplication of effort.

Code and Documentation Standards

All code and documentation must follow agreed-upon standards for consistency.

- Addressing Issues: Conduct peer reviews before merging code or finalizing documentation to ensure quality and adherence to standards.

Meeting Deadlines

Submit all deliverables at least 24 hours before deadlines to allow time for team review.

- Addressing Issues: Members unable to meet this norm must inform the team at least 48 hours in advance.

Learning and Support

Team members should help each other by sharing knowledge and offering support on challenging tasks.

- Addressing Issues: Create a shared document or chat thread for quick questions and answers.

Signatures:

By signing below, we agree to uphold these team norms and work towards becoming a high-performing team.
